Year 2021

Mizoram State Biodiversity Board
Office of Chief Wildlfie Warden
Environment, Forest & Climate Change Department
MINECO, Khatla, Aizawl
Mizoram

PART-I

1. The Biological Diversity Act, 2002 & Rules, 2004

The Biological Diversity Act, 2002 (No. 18 of 2003) was notified by the Government of India on 5th February, 2003. The Act extends to the whole of India and reaffirms the sovereign rights of the country over its biological resources. Subsequently the Government of India published Biological Diversity Rules, 2004 (15th April, 2004). The Rules under section 22 states that 'every local body shall constitute a Biodiversity Management Committee (BMC) within its area of jurisdiction'.

2. People's Biodiversity Registers and role of the Biodiversity Management Committee

The mandate of the Biodiversity Management Committee has been clearly highlighted in the Biological Diversity Rules 2002 as follows:

- The main function of the BMC is to prepare People's Biodiversity Register in consultation with the local people. The register shall contain comprehensive information on availability and knowledge of local biological resources, their medicinal or any other use.
- > The other functions of the BMC are to advice on any matter referred to it by the State Biodiversity Board or Authority for granting approval, to maintain data about local vaids and practitioners using the biological resources.
- > The Authority shall take steps to specify the form of People's Biodiversity Registers, and the particulars it shall contain and the format for electronic database.
- > The Authority and the State Biodiversity Boards shall provide guidance and technical support to the Biodiversity Management Committees for preparing People's Biodiversity Register.
- > The People's Biodiversity Registers shall be maintained and validated by the Biodiversity Management Committees.

3. People's Biodiversity Registers and role of National Biodiversity Authority (NBA)

The National Biodiversity Authority shall provide guidance and technical support to the Biodiversity Management Committee (BMC) for preparing People's Biodiversity Register.

People's Biodiversity Registers and the role of State Biodiversity Board (SBB)

The State Biodiversity Board (SBB) would provide necessary training to the technical Support Group (TSG) of the district and enable smooth functioning and aid in networking for creation and maintenance of People's Biodiversity Registers (PBR).

People's Biodiversity Registers and Role of the Technical Support Group (TSG)

The Technical Support Group (TSG) will consist of experts from various disciplines and line departments, universities, research institutes, colleges and schools and non-governmental organizations. The Technical Support Group will provide technical inputs and advice to the BMC's on identification of plants and animals, monitor and evaluate the PBR exercise, examine confidential information and advice on legal protection, maintain a database of local and external experts on biodiversity.

4. People's Biodiversity Registers (PBR)

Being a mega biodiverse country, India is very rich in biological and cultural diversity. It is also a home of many tribal groups, pursuing different kinds of nature based livelihoods. In addition, a large number of farming, fishing communities, and nomadic group possessed traditional knowledge of varying degrees. The development of modern science and technology in biotechnology and information technologies have increased the value of biodiversity and associated knowledge including traditional knowledge (TK). The growing importance of biodiversity, bio-resources and associated knowledge is fairly well understood. The first step towards conservation is sustainable utilization of biodiversity and its documentation. Biodiversity and associated knowledge is found in different ecosystems under different legal management regimes and hence the results and the manner of documentation will also differ.

The present manual guidelines have been drafted taking into consideration different ecosystems and include the rural, urban and protected areas. The guidelines may be customized and further information may be added to enrich the effort. It is important to keep in mind some of the issues related to PBRs:

- > It is to be undertaken in a participatory mode involving varying sections of village society
- ➤ While documenting the PBR, knowledge and views of both genders are to be recorded
- Information's provided by the community should be collated, analyzed and crosschecked by the members of the Technical Support group (TSG) before documentation
- > PBR is important base document in the legal arena as evidence of prior knowledge and hence careful documentation is necessary
- The document should be endorsed by the BMC and later publicized in the Gram Sabha/Grma Panchayat/Panchayat Samiti. The document can be a very useful tool in the management and sustainable use of bio-resources. The document can also be a very useful teaching tool for teaching environmental studies at schools, colleges and university level.
- > The document should be periodically updated with the additional and new information as and when generated.

4.1 The PBR Process

The preparation of People's Biodiversity registers (PBR) involves the active support and cooperation of a large number of people who need to share their common as well as knowledge (traditional knowledge). The first and foremost important task for preparing a PBR is organizing a group meeting to explain the objectives and purpose of the exercise. Different social groups in the village need to be identified for purpose of data collection from those groups. In an urban situation, spots where biodiversity are important need to be identified for the purpose of the study and documentation. The documentation process includes information gathered from individuals through detailed questionnaire; focused group discussion with person's having knowledge and published secondary information.

4.2 Documentation and Traditional Knowledge (TK) related to biodiversity

Documentation of knowledge of individuals with regard to biodiversity and its uses is an important part of PBR. Every effort should be made to identify the persons with proven knowledge of local biodiversity; special attention should be given to the elderly persons who can also provide information on the biodiversity which was available in the past but no longer seen at present. In some cases focus group discussion may be held for the purpose of documentation.

4.3 PBR Methodology

The PBR is a participatory process requiring intensive and extensive consultation with the people. The objectives and purpose is to be explained in a group meeting in the presence of all sections of people in the Panchayat, members of the BMC, students, knowledgeable individuals and those interested in the effort. Documentation includes photographs (including digital images), drawings, audio and video recordings and other records like printed material.

4.4 Process in PBR Preparation

Step I: Formation of Biodiversity Management Committee (BMC)

Step II : Sensitization of the community/local people about the study, survey and possible management

Step III : Training of members in identification and collection of data on biological resources and traditional knowledge

Step IV : Collection of data. Data collections includes review of literature on the natural resources of the districts, Participatory Rural

Appraisal (PRAs) at village level, household interviews, individual interviews with village leaders and knowledgeable individuals,

household heads, key actors of the panchayat raj institutions and NGOs and direct field observations

Step V : Analysis and validation of data in consultation with technical support group and BMC

Step VI: Preparation of People's Biodiversity Register (PBR)

Step VII : Computerization of information and resources.

General Details of People's Biodiversity Register (PBR) of Tuipui 'D'

Name of the village : Tuipui 'D'

Block : Hnahthial RD Block

District : Hnahthial

State : Mizoram

Geographical Area of the Panchayat Samity : 2 Sq.kms

Population under the Panchayat Samity : 1050

Male : 578

Female : 572

Habitat and Topography : Tropical evergreen forest, Hilly terrain & Plain

Climate (Rainfall, Temperature and other : $8 \text{ }^{\circ}\text{C} - 34 \text{ }^{\circ}\text{C}$ temp; 3000-4000mm rainfall

weather patterns)

Land use (Nine fold classification available

with village records) : Agriculture/Farming

Date, Month and Year of PBR preparation :

Management Regime: Reserve Forests (RF)/ : Community Owned and Managed Forests

Joint Management (JM)/Protected areas (PA)/ Community Owned and Managed Forests (COM)

Annexure I

Details of the BMC members of the Panchayat (One elected chairperson and six persons nominated by the local body; not less than one third to be women and not less than 18% belonging to SC/ST)

1. Name of the Chairman : F. LALTHANTLUANGA

Age : 53
Gender : Male
Address : Tuipui 'D'

Area of specialization :

2. Name : C. LALNEIHKIMA

Age : 59
Gender : Male
Address : Tuipui 'D'

Area of specialization :

3. Name : HK. DANIELA

Age : 55 Gender : Male

Address : Tuipui 'D'

Area of specialization :

4. Name : VANLALZAUVA

Age : 43
Gender : Male
Address : Tuipui 'D'

Area of specialization :

5. Name F. LALREMSANGA

> Age 49 Gender

Male

Tuipui 'D' Address

Area of specialization

6. Name LALHMANGAIHI

> 59 Age

Gender Female Address Tuipui 'D'

Area of specialization

7. Name H. LALTHLAMUANA

> Age 58 Gender Male

Address Tuipui 'D'

Area of specialization

8. Name T. LALRAMENGI

> Age 45

Female Gender Address Tuipui 'D'

Area of specialization

Annexure II

List of Vaids, hakims and traditional healthcare (human and livestock) practitioners residing and or using biological resources occurring within the jurisdiction of the village.

Name : KAPZAMA

Age : 75 Gender : Male

Address : Tuipui 'D'

Area of specialization :

Location from which the person accesses biological material

Perception of the practitioner

on the resource status

Annexure III

List of individuals perceived by the villagers to possess Traditional knowledge (TK) related to biodiversity in agriculture, fisheries and forestry.

Name : NIL

Age : Gender : Address : Area of Specialization :

Annexure IV

Details of schools, colleges, departments, universities, government institutions, non-governmental organization and individuals involved in the preparation of the PBR

1) Contact Person : Dr. Lalneihpuia Chhakchhuak

Name and Address : Technical Assistant

Mizoram State Biodiversity Board

2) Contact Person : Derrick Zothanmawia

Name and Address : Computer Assistant

Mizoram State Biodiversity Board

3) Contact Person :

Name and Address :

Special Features	Cropping Season	Uses	Associated TK	Other Details	Source of Seeds /Plants	Community Knowledge Holder
Rhizome is used as condiment	Mar-May	Edible	Juice of rhizome is used for stomach ulcer, jaundice, doarrhoea, dysentery, cholera, asthma, food poisoning, and also used as a tonic for blood purifier	-	Local	Mizo
Young leaves are eaten as vegetables	Whole year	Edible	Seeds and oil are used in medicine	-	Local	Mizo
Leaves are eaten as vegetables, curry	Mar-Apr	Edible	Leaves are used as diuretic, sedative, refrigerant	-	Local	Mizo
Tuber is anthelmintic	Mar-Apr	Edible	Tubers and bubils are used as vegetable, tuber is used in treating cancer, piles, and gonorrhoea	-	Local	Mizo
Leaves used as flavouring dishes	Mar-Apr	Edible	Leaves are used for expulsion of threadworms from the body, as a remedy for food poisoning. Roots and leaves are boiled and the water is drunk for malarial fever, diabetes, pneumonia, and constipation	-	Local	Mizo
Spadix is eaten cooked as vegetable	Mar-Apr	Edible	-	-	Local	Mizo
Corm, stem and young leaves are eaten as vegetables	Aug-Dec	Edible	Acrid juice is applied to wounds and bee sting. Whole plant is used for pig feed	-	Local	Mizo
Unripe fruit as vegetable	Mar-May	Edible	Root, leaves, fruits and seeds are used as medicine	-	Local	Mizo
Unripe fruit eaten as vegetable	Mar-May	Edible	Cut fruit soaked in water overnight (water) is used to control diabetes	-	Local	Mizo
Green immature pods are cooked and eaten as vegetables	Whole year	Edible	Beans are also used for diarrhoea, dysentery, burns, diabetes, rheumatism, sciatica etc	-	Local	Mizo
Young leaves, pods and seeds as vegetable	Mar-Apr	Edible	Seed is useful to strengthen stomach and kills worm in the stomach	-	Local	Mizo
Tender leaves, pods as vegetable, yellow seeds as pulse	Whole year	Edible	Leaves and seeds are medicinal, leaves as cattle fodder	-	Local	Mizo
Seeds are edible rich in protein, oils and minerals	Jun-Jul	Edible	Seeds are cooked, fermented and eaten as delicacies (called <i>Bekang</i> famous –traditional Mizo dish). Boiled water of seeds are given to pigs for fertility control	-	Local	Mizo
Young pods, seeds as vegetable	Whole year	Edible	Juice of crushed leaves is used against diarrhoea, stomach-ache	-	Local	Mizo
Young pods as vegetable	Mar-Apr	Edible	The plant is a good fodder, green manuring and ground cover	-	Local	Mizo
Fruit and young leaves as vegetable	Mar-May	Edible	Fruits and leaves are considered antidote for snake bite	-	Local	Mizo
Seeds are eaten cooked as vegetable	Mar-Apr	Edible	-	-	Local	Mizo
Flower buds and leaves are eaten as vegetable	Aug-Sept	Edible	-	-	Local	Mizo
Grain is the staple food	Apr-May	Edible	Chipstraw is boiled and the water is used for kidney stone and urinary problems. Rice wash water is also used for diarrhoea, dysentery	-	Local	Mizo
Seeds as pulse and young leaves are eaten as vegetable	Aug-Sept	Edible	-	-	Local	Mizo
Young fruit and leaves are cooked or fried eaten as vegetable	Whole year	Edible	Leaves and fruits are medicinal used to treat fever, jaundice, diabetes, dysentery, intestinal worms etc	-	Local	Mizo
-	Mar-Apr	Edible	Baked grains are pounded and eaten as curry	-	Local	Mizo
Leaves and flowers are used as condiment	Whole year	Edible	-	-	Local	Mizo

Fruit is edible	Mar-May	Edible	Juice of the leaves and stem are used in high blood pressure. Fruits and seeds are also medicinal	-	Local	Mizo
-	Mar-Apr	Edible	Grains are cooked and eaten	-	Local	Mizo
Fruits are condiment and leaves as vegetable	Whole year	Edible	Juice of the fruits is applied to burns, snake bite and centipede sting	-	Local	Mizo
Fruits are condiment and leaves as vegetable	Whole year	Edible	Juice of the fruits is applied to burns, snake bite and centipede sting	-	Local	Mizo
Leaves are eaten as vegetables, curry	Mar-Apr	Edible	Leaves are used as diuretic, sedative, refrigerant	-	Local	Mizo
Leaves and flowers -are used for flavouring curry-	Apr-May	Edible	-	-	Local	Mizo
Flowers, fruit, you-ng leaves and stem are all eaten as v-egetables	Apr-May	Edible	Seeds are used to expel worms from the body	-	Local	Mizo
Fruits and tender leaves are eaten as vegetable	Apr-May	Edible	Juice of the fruit is a cure for cholera, diarrhoea, dysentery, fever, asthma, vomiting and kidney diseases. Infusion of leaves and fruit are used externally in snake bite	-	Local	Mizo
Fruit is cooked and eaten as vegetable	Mar-Apr	Edible	-	-	Local	Mizo
Young fruit and flower eaten as vegetable	Aug-Sep	Edible	Roots, leaves and seeds are medicinal	-	Local	Mizo
Flower buds and leaves are eaten as vegetable	Aug-Sept	Edible	-	-	Local	Mizo
Leaves and flowers are used as condiment	Whole year	Edible	-	-	Local	Mizo
Leaves and flowers are eaten cooked as vegetable	Whole year	Edible	Leaves are cooked with water and water is taken for hypertension, blood sugar etc	-	Local	Mizo
Leaves and flowers are used as condiment	Mar-apr	Edible	-	-	Local	Mizo
Green- fruit are eaten as vegetable	Apr-May	Edible	Fruit is good for high blood pressure, skin problems and anti microbial	-	Local	Mizo
Rhizomes are used as spice and condiment, taken as cure for food poisoning	Apr-May	Edible	Tender leaves, young flowers are eaten cooked as vegetable, juice of the pounded rhizomes is given to women in case of insufficient supply of milk for their babies and also dropped into the ear when attacked by ticks.	-	Local	Mizo
-	Whole year	Edible	Corm and young leaf stalk and shoots are eaten cooked as veg.	-	Local	Mizo
Fruit is edible	Whole year	Edible	-	-	Local	Mizo
-	Mar-Apr	Edible	Leaves are pounded, dried and used for making cigarette	-	Local	Mizo
Grains are eate-n cooked, roasted, fried-	Apr-May	Edible	Grains and leaves are used to feed poultry, pigs and cows. Decoction of the grain is used as hip bath for piles, lessen pain	-	Local	Mizo
-	Aug-Sep	Edible	Leaves and head are eaten cooked as vegetable	-	Local	Mizo

Format 10 : Soil type

1	2	3	4
Soil Type	Color & Texture	Features	Soil Management
Red soil and sandy loamy soil	-	-	Soil fertility is maintained and preserved by practicing terrace system for cultivation of agricultural crops. The community does not practice any other systematic mechanism for the management of soils in the village. Generally They also practice using pig dung and chicken manure as fertilizers for their crops. Generally, soils are highly fertile and any kind of jhum crops can be cultivated and thrives very well in this kind of soils.

Abundant	Abundant	Medicinal	Rhizome	Juice of rhizome is used for stomach ulcer, jaundice, doarrhoea, dysentery, cholera, asthma, food poisoning, and also used as a tonic for blood purifier	Own use	Mizo
Less frequent	Less frequent	Medicinal	Rhizome	Rhizome is used for stomach ache, diarrhoea, dysentery, jaundice, asthma, measles, food allergy or food poisoning	Own use	Mizo
Abundant	Abundant	Medicinal	Stalks, Rhizomes	Stalks are used as vegetables, cooked stalk are eaten to increase breast milk. Rhizomes are used in manufacturing of prefumes	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves, berries	Leaves are boiled in water and taken against urinary problems and kidney stones. Juice of green berries is applied to boils, ringworm etc	Own use	Mizo
Abundant	Abundant	Medicinal	Fruit	Fruit is rich in antioxidant and used in medicine	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves, fruit, bark	Decoction of root & bark is used in fevers, colic, stomach ulcer, indigestion, dysentery, diarrhoea etc. Poultice of the bark is applied to rheumatism, sprains, imflammations and skin diseases. Decoction of leaves is used in flatulence, ulcers, etc. decoction of fruit is used to treat diseases iof liver, hepatitis etc	Own use	Mizo
Abundant	Abundant	Medicinal	Leaf pulp	Leaf pulp is used for liver complaints, spleen enlargement, jaundice, asthma, kidney stones, ulcers, fresh cuts and wounds, burns, skin diseases.	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves	Juice of leaves is applied to herpes eruptions	Own use	Mizo
Less frequent	Less frequent	Medicinal	Tuber, Bulbil	Tubers and Bulbil are use as vegetable and also used to treat cancer	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves, roots	Leaves are used for flavouring curry. They are used for expulsion of threadworms from the body, as a remedy for food poisoning. Roots and leaves are boiled for treating malarial fever, diabetes, pneumonia, constipation	Own use	Mizo
Less frequent	Less frequent	Medicinal	Leaves	Whole Plant is medicinal	Own use	Mizo
Less frequent	Less frequent	Medicinal	Fruit, Bark	Fruit is useful in diabetes, digestion, dysentery and diarrhoea. Root bark is used for poisoning of fish.		Mizo
Less frequent	Less frequent	Medicinal	Leaves	Decoction of leaves used in ulcer, asthma, sores, dandruff etc	Own use	Mizo
Less frequent	Less frequent	Medicinal	Shrub, milky juie	Pith of this shrub and unripe fruit of papaya are cooked with chicken and water is taken against diseases of liver, chronic fever. Milky juice is used externally for ringworm, rheumatism, sciatica, boils, warts etc	Own use	Mizo
Abundant	Plenty	Medicinal	Bark, Leaves	Bark and leaves decoction used in stomach ulcer, diarrhoea and dysentery.	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves & Fruits	Juice of crushed leaves & fruits are used against diarrhoea, sore throat, stomach ulcer, tonsillitis and toothache	Own use	Mizo
Less frequent	Less frequent	Medicinal	Stem juice	Juice of the stem is used as a remedy for jaundice, purifies blood, good for lungs, diuretic etc	Own use	Mizo
Abundant	Abundant	Medicinal	Roots	Roots decoction used in piles and jaundice, diseases of liver and kidney etc	Own use	Mizo
Abundant	Abundant	Medicinal	Bark & Leaves	Decoction of bark and leaves used for diabetes, cholera, internal bleeding, stomach ulcer etc. Leaves are used for fermenting cooked soya bean (<i>Bekang</i>), famous mizo dish.	Own use	Mizo

		Medicinal	Rhizome	Juice of the pounded rhizome is used in indigestion, stomach trouble, dysuria, dysentery.		Mizo
Abundant	Abundant	Medicinal	Leaves	Leaf juice applied on fresh wounds, stomach pain & ulcer	Own use	Mizo
Less frequent	Less frequent	Medicinal	Bark, leaves	Decoction of bark, leaves is used for curing gastric trouble, asthma, dysentery, cancer etc	Own use	Mizo
Abundant	Abundant	Medicinal	Root, leaves	Roots and leaves are used to treat stomachache	Own use	Mizo
Abundant	Abundant	Medicinal	Roots & leaves	Decoction of roots/leaves is medicinal. The plant is also used as fish poison	Own use	Mizo
		Medicinal	Root	Bitter root is used in fever, dysuria, spleen enlargement, liver diseases, stomachache, diarrhoea, dysentery etc and also applied to wounds, sores and boils.		Mizo
		Medicinal	Seeds	Seeds yields chaulumugra oil which is used in rheumatism, leprosy, psoriasis and other skin diseases.		Mizo
Abundant	Abundant	Medicinal	Leaves & fruits	Decoction of fruit & Leaves used in various diseases	Own use	Mizo
		Medicinal	Leaves, Fruit	Water is put inside the empty fruit and shaken, the water becomes bitter and drunk for stomachache etc.		Mizo
Abundant	Abundant	Medicinal	Whole plant	Plant is used in diabetes, jaundice, pile,dysentery,diarrhoea,hypertension etc	Own use	Mizo
Abundant	Abundant	Medicinal	Fruit & Leaves	Juice of fruit is used for diarrhoea, cholera, diabetes, vomiting, kidney problems	Own use	Mizo
Abundant	Abundant	Medicinal	Whole plant	Juice of the whole plant is used for cholera, dyenstery, fever, liver problems and jaundice, diabetes etc	Own use	Mizo
Abundant	Abundant	Medicinal	Root, bark, leaves	Muga silkworm feeds on the leaves. Roots, bark and leaves are used in medicine	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves	Boiled water of leaves is used to treat diabetes, hypertension, stomach problems etc	Own use	Mizo
Abundant	Abundant	Medicinal	Roots & fruits	Roots are used in colic, vomitting, flatulence. Fruits used in asthma, cough, diarrhoea, fever, blood purifier, skin diseases etc	Own use	Mizo
Less frequent	Less frequent	Medicinal	Bark & Leaves	Decoction of Bark & leaves used in stomach ulcer, indigestion, womb troubles etc	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves	Leaf juice used in High blood pressure	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves	Decoction of leaves used in measles, chicken pox, scabies etc	Own use	Mizo
		Medicinal	Fruit, root	Fruit is hit, anthelmintic, used in bronchitis, ulcers, skin diaseses, small tumors and slightly inflammations, leprosy, diabetes, etc. decoction of rott bark is also recommended for diabetes.		Mizo
Abundant	Abundant	Medicinal	Roots & leaves	Decoction of roots and leaves is used for treating menstrual and urinary problems	Own use	Mizo
Less frequent	Less frequent	Medicinal	Rhizome	Rhizomes are used as spice and condiment, taken as a cure for food poisoning. Juice of pounded rhizome is is given to women in case of sufficient supply of milk for their children and also dropped into the ear when attacked by ticks.	Own use	Mizo
Less frequent	Less frequent	Medicinal	Leaves, stem	Stem and leaves are eaten against diarrhoea and dysentery, juice of the sten or stalk is also applied to rash or sores etc	Own use	Mizo
Abundant	Abundant	Medicinal	Roots	Juice of crushed roots used in diseases of kidney, fever, jaundice, bronchitis etc	Own use	Mizo
Abundant	Abundant	Medicinal	Fruit	-do-	Own use	Mizo
Abundant	Abundant	Medicinal	Fruit	Unripe fruit are eaten as vegetable. Roots and fruit are used in high blood pressure, asthma, dysuria, fever, colic. Crushed fruit is used in burns, boils etc	Own use	Mizo

Abundant	Abundant	Medicinal	Whole plant	Whole plant is used as poultice for cramps, rheumatism, sciatica, wounds etc	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves, fruit	Fruit is edible and used for constipation, stomach troubles, juice of boiled leaves is used in treating stomach ulcer, cancer and other stomach related problems	Own use	Mizo
Abundant	Abundant	Medicinal	Bark, stem	Juice of bark and stem is used for infection, wounds and cuts etc	Own use	Mizo
Abundant	Abundant	Medicinal	Bark and juice	Bark is useful in treatment of high blood pressure, asthma, typhoid, malaria, diarrhoea, dysentery. Milky juice applied in fresh cuts, sores, ringworm, wart,etc	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves	Juice of the leaves applied to fresh cuts	Own use	Mizo
Abundant	Abundant	Medicinal	Buds	Plaintain is cooked with water and water is drink for treating deficiency of white blood	Own use	Mizo
Less frequent	Less frequent	Medicinal	Leaves	Decoction of leave used against diabetes, new cuts, stomach problem etc and also for treatment of cancer	Own use	Mizo
Less frequent	Less frequent	Medicinal	Bark, Levaes	Bark and leaves are useful in snake bites	Own use	Mizo
Abundant	Abundant	Medicinal	Whole plant	The whole plant is regarded as a specific for rheumatic affection, in which it is administered both internally and externally. Juice of crushed leaves is used in diarrhoea and dysentery. Stem and leaves are also chewed for relief in toothache	Own use	Mizo
Abundant	Abundant	Medicinal	Leaves	Leaves are lopped for fodder. Bark and young leaves are used as remedy for fever, stomach pain etc	Own use	Mizo
Abundant	Abundant	Medicinal	Stem	Stem juice used for mouth sore, stomach ulcer etc	Own use	Mizo

Commercial/ own use	Part collected	Associated TK	Other details	Community Knowledge Holder
Own use	Young shoots, Buds	Stem is used for tying purposes, leaves are also used for fermenting cooked soya beans	Plant is used for a cure of enlargement of the liver, young shoots and buds are eaten cooked or fired as vegetables	Mizo
Own use	Whole plant	Fruits edible, leaves are used for cuts, diarroea and dysentery	Whole plant is used for high blood pressure	Mizo
Own use	Root	Decoction/infusion of root is useful in diseases of kidney, dysuria, stomach complaints, dysentery and for expelling threadworms from the body	-	Mizo
Own use	Fronds	-	Young fronds are eaten cooked as vegetable	Mizo
Own use	Culms, shoots	Culms are used for receptacle of womans pipe, basket work and building	Young shoots are edible.	Mizo
Own use	Leaves	Leaves are sometimes lopped for cattle fodder	In some places, planted as hedge plant	Mizo
Own use	Fruit	Fruit is used for treating dysentery	-	Mizo
Own use	-	The plant is used as a cover crop in Rubber and Oil palm plantation	-	Mizo
Own use	Roots, Leaves	Roots are used to poison fish	Leaves are eaten by cattle and buffaloes	Mizo
Own use	Cane, leaves	Cane is used for making furniture and basket, leaves for thatching	-	Mizo
Own use	Stem	Pieces of stem are used for cleaning teeth	-	Mizo
Own use	-	-	-	Mizo
Own use	Shoots, flowers, fruits	Shoots, young fruits and flower buds are eaten as vegetable	Roots and leaves are used to treat stomach-ache	Mizo
Own use	Leaves, seeds	Seeds are used for washing hairs and splitted stem for tying purposes. It is also used for playing games by Mizo boys and girls. Pounded seeds mixed with water is used for expelling leeches from cattle nostrils	Tender leaves are eaten cooked as vegetable. Seeds are roasted and eaten.	Mizo
Own use	Leaves	Leaves are eaten cooked as vegetable, and also used against diarrhoea, dysentery, stomach-ache, digestive troubles, diabetes etc	-	Mizo
Own use	Leaves	Tender leaves are acid and eaten as vegetable.	Plants are prescribed for asthma, bronchitis and pneumonia. Leaves are also used in scabies and snake bite	Mizo
Own use	Bark	Bark is used as fish poison and medicine	-	Mizo
Own use	-	-	-	Mizo
Own use	Leaves	Muga silkworm feeds on the leaves, leaves for cattle fodder	Roots abrk and leaves are used in medicine	Mizo
Own use	Roots, shoots	Tuberous roots are eaten cooked or fried.	Tuberous roots are used externally for skin diseases	Mizo
Own use	Leaves, flower, fruit	The tender leaves including flowers and fruits are cooked or fried eaten as vegetable. Seeds are also roasted and eaten	Fibres of inner bark are good for nets and ropes	Mizo
Own use	Tuber, Petiole	Juice of the crushed tuber is used to cure abdominal pain and to stop bleeding	Tender white petiole is also used for liver problems and stomach pain	Mizo
Own use	Culms, shoots	Culms are used for temporary building, mats, baskets, agarbati sticks, paper, fuel, gutters, water vessel etc	Young shoots are eaten cooked as vegetables	Mizo

Own use	Culms, Shoots	Culms are used for making paper pulp, baskets, building etc	Young shoots are eaten cooked as vegetables	Mizo
Own use	Culms, shoots	Culms are used for building purposes	Young shoots are eaten cooked as vegetables	Mizo
Own use	Stem	It is used for making hats, baskets etc.	Juice of stem is used for influenza and applied to scalp for curing dandruff, falling hairs and baldness.	Mizo
Own use	Bark, Leaves	Bark used for poisoning fish. Decoction of the leaves used in case of both measles, chicken pox, scabies and skin itching.	-	Mizo
Own use	-	-	-	Mizo
Own use	Roots	Decoction of roots is used in diseases of liver, jaundice, fever, chicken pox, skin itching.	Pounded roots with crabs are prescribed in malaria and jaundice	Mizo
Own use	Bark, Leaves	Bark and leaves are useful in application of snake bites	-	Mizo
Own use	Leaves	Juice of the leaves is useful for diabetes, eye diseases, fresh cuts. Decoction of leaves is used for stomach troubles	-	Mizo
Own use	Stem , Leaves	Juice of the crushed leaves is used for diarrhoea and dysentery. Stem and leaves are also chewed for relief in toothache	-	Mizo
Own use	Wood, bark, leaves	Wood is hard used for house posts, tool handles, fuel and charcoal. Decoction of bark is used in stomach pain, fever, diarrhoea, measles, chicken pox, sprains and burns.	Leaves are cooked with water and the water is used for treating high blood pressure	Mizo
Own use	Bark	Bark is used for making rope	-	Mizo
Own use	Tubers	Tubers are usedfor treatment of dysuria, cough, rheumatism, malarial fevere etc	Tuberous roots are sweet and eaten by man and wild animals	Mizo
Own use	Wood, bark	Bark is bruised and boiled with soil impregnated with urine to produce a bluish dye	Wood is used for house building, scaffolding,plywood, firewood etc	Mizo

Format 19: Wild Plant Species of Importance

1	2	3	4	5
Local Name	Scientific Name	Variety	Importance (Economic, Social & Cultural)	Status
Anchiri	Homalomena aromatica	Wild	Rhizome and petiole are medicinal, it is also used for making fragrance	Abundant
Builukham	Osbeckia sp.	Wild	Leaves are used for cuts, diarrhoea nad dysentery. Whole plant is used for hypertension	Abundant
Hnahthial	Phrynium/Stachyphrynium sp.	Wild	Leaves are used for packing and wrapping food stuff and vegetables, also used for carpeting rice bin	Abundant
Hruivankai	Tinospora sinensis	Wild	Juice of the pounded rhizome is used in indigestion, stomach trouble, dysuria, dysentery.	
	Bergnia pacumbis	Wild	Bitter root is used in fever, dysuria, spleen enlargement, livaer diseases, stomachache, diarrhoea, dysentery etc and also applied to wounds, sores and boils.	Less frequent
Kham damdawi				
Khaupui	Sterculia villosa	Wild	Bark yields a strong fibre. Decoction of bark is used cholera, dysentery, diarrhoea and tonsilities	Abundant
Lal ruanga dawibur	Zanonia indica	Wild	Water is put inside the empty fruit and shaken, the water becomes bitter and drunk for stomachache etc.	Rare
Phaktel	Bridelia montana	Wild	Wood is used for posts, tool handles, house construction, firewood etc. Roots and bark are medicine.	Abundant
Rulei	Millettia pachycarpa	Wild	Roots and pods are used to poison fish. Juice of crushed roots is applied on mange of pigs	Abundant
Saithei	Gynocardia odorata	Wild	Fruit is hit, anthelmintic, used in bronchitis, ulcers, skin diaseses, small tumors and slightly inflammations, leprosy, diabetes, etc. decoction of rott bark is also recommended for diabetes.	Rare
Thelret	Ficus elastica	Wild	It yields Indian rubber of commerce. Leaves are used for fodder	Abundant
Zairum	Anogeissus acuminata	Wild	Wood is used for charcoal, fuel, tool handles. Water of cooked leaves is taken as remedy for high blood pressure. Decoction of bark is used in stomach troubles, fever, diarrhoea and also applied on measles, chicken pox, sprains and burns	Abundant
Zihnghal	Stereospermum tetragonum	Wild	Wood is used for house construction, furniture, tool handles, firewood etc. leaves are lopped for fodder. Bark and young leaves are used as remedy for fever, stomach-ache etc. roots and flowers are also used medicinally.	Abundant

Part Used	Associated TK	Other details	Community/ knowledge holder
Shoots, buds	The plant is used for a cure of enlargement of liver and the stem for tying purposes. Leaves are used for fermenting cooked soya beans.	-	Mizo
Leaves, berries	Water of boiled leaves is taken against urinary problems and stones in kidney. Juice of green berries is applied to ringworm, boils etc.	-	Mizo
Stem, leaves	Flowers are chewed to relive toothache and affections of the gums and throat	-	Mizo
Roots, bark, leaves	Decoction of root & bark is used in fevers, colic, stomach ulcer, indigestion, dysentery, diarrhoea etc. Poultice of the bark is applied to rheumatism, sprains, imflammations and skin diseases. Decoction of leaves is used in flatulence, ulcers, etc. decoction of fruit is used to treat diseases of liver, hepatitis etc	-	Mizo
Spadix, stem	Juice of the plant is used externally for snake bite. Leaf is also used for catching land leech from the body	-	Mizo
Leaves	-	=	Mizo
Stem, Buds, leaves	Juice of stem is used for snake bites, diarrhoea, dysentery and pounded seeds for diabetes	-	Mizo
Leaves, fruit	Young leaves are eaten as vegetable, but several changes of water is needed while cooking. Decoction of fruit is used against stomach-ache, dysentery	-	Mizo
Seeds	-	-	Mizo
Leaves, buds	Leaves are used for feasts instead of rice plates. Stems are used for pig feed. Leaves are also used for cattle fodder	-	Mizo
Leaves	-	-	Mizo
Whole plant	Roots and leaves are used to treat stomachache, leaves are also used as fodder	-	Mizo
Leaves	-	-	Mizo
Fruit, shoots, leaves	Decoction of leaves is given to women after birth	-	Mizo
Leaves	Fruit is used as soap for washing clothes, fibrous fruit as brush for pots, plates etc. decoction of roots is recommende for treating malaria, diabetes and seeds as a purgative	-	Mizo
Leaves, flowers, fruit and seeds	Fibres of inner bark are good for nets and ropes	-	Mizo
Leaves, Flowers	Decoction of leaves is used to reduce high blood pressure and decrease breast feeding mother's breast milk, also used to heal acute mastities	-	Mizo
Leaves, flowers	-	-	Mizo
Whole plant	-	-	Mizo
Fruit	fruit is medicinal used to treat hypertension and diabetes	-	Mizo
Corm, young leaf, shoot	The corm with <i>Ching-al</i> (Lye) is boiled to remove irritants. So, the boiled corm is mixed with <i>Sa-um</i> (fermented pork fat), <i>Ching-al</i> (Lye) and Salt and then eaten as curry (Traditional Mizo Dish)	-	Mizo
Whole plant	Fibres are used for fiddle strings, traps etc. the down beneath the laef stalks on the trunk is used for tinder and is known as ' <i>Meibu</i> '. Midrib of the leaflets is good for sweeping like a broom.	-	Mizo
Leaves	-	-	Mizo
Fruit, leaves	Leaves are eaten cooked as vegetable and also used for pig's feed	-	Mizo
Whole plant	Fibre is made into ropes, brushes, brooms, basket etc. terminal bud is eaten cooked as vegetable	-	Mizo
Bud, stem, leaves	Leaves are used for feasts instead of rice plates. Stems are used for pig feed. Leaves are also used for cattle fodder	-	Mizo
Whole plant	Whole plant is used in medicine, used for treating cancer etc	=	Mizo

-	-	Mizo
Bark yields a strong fibre and leaves are lopped for cattle fodder	It is a light demanding tree, fsat growing and short lived tree	Mizo
-	-	Mizo
-	Ripe fruit is eaten by birds and animals	Mizo
-	It is a shade bearer and fast growing tree	Mizo
Bark and aerial roots are used for making coarse ropes	Leaves are good for cattle fodder	Mizo
-	Leaves are good for fodder, it is a fast growing tree	Mizo
-	Leaves are lopped for cattle fodder	Mizo
-	Leaves are lopped for cattle fodder	Mizo
Tender pods are edible, seeds edible roasted or boiling, bark and leaves are also used in medicine	It is a fast growing tree and cultivated as ornamental and hedge plant	Mizo
Decoction of young leaves is used in diabetes, diarrhoea and ash of dried leaves is taken to stop hiccough	It prefers deep well drained loamy soil and it is a shade bearer	Mizo
Decoction of young leaves is used in diabetes, diarrhoea and ash of dried leaves is taken to stop hiccough	It prefers deep well drained loamy soil and it is a shade bearer	Mizo
Leaves and twigs are lopped for cattle fodder	Bark, fruit and leaves are used in medicine	Mizo
Seed is very useful for treating diabetes and the bark for fever, jaundice, urinary problems, sore throat, ronchitis, asthma, ulcers and chronic dysentery etc	Fruits are eaten by man, birds and wild animals	Mizo
-	-	Mizo
-	-	Mizo
Bark is scraped with dao and the powder is used for stupefying bees (Khawiyah)	Fruits are used for poisoning fish	Mizo
Seeds are eaten roasted or fried. Bark yields a strong fibre	Decoction of the bark is used in cholera, dysentery, diarrhoea and tonsilities	Mizo
Powdered fruit is used in scorpion sting, bites of centipede, juice of the bark for chronic ulcer and fresh cuts. Leaves are lopped for fodder	Tender leaves are cooked eaten. It is moderate light demander and moderately fast growing tree	Mizo
Pounded bark is used for poisoning of fish	-	Mizo
Juice of young leaves is used for curing tonsillitis and sores	Bark, stem and leaves are also medicinal. Leaves are lopped for cattle fodder	Mizo
Tender leaves are eaten cooked as vegetable, seed is chewed as a substitute for betel nut, bark sometimes used as tea leaves	-	Mizo
Bark is used for constipation and leaves for toothache	-	Mizo

Muga Silkworm are reared on the leaves	Roots, bark and leaves are used in medicine, leaves are for cattle fodder	Mizo
Leaves are lopped for cattle fodder	This tree is a quick growing and moderate light demander	Mizo
-	-	Mizo
Leaves are lopped for cattle fodder	-	Mizo
Leaves are lopped for cattle fodder	-	Mizo
Leaves are used for cattle fodder	-	Mizo
Tender leaves are cooked and eaten without its water as vegetables	Leaves are lopped for cattle fodder	Mizo
-	-	Mizo
Cotton is used for pillows and cushions, leaves for fodder. Tender leaves, flowers and calyces are used as vegetable	It is a strong light demander, fire resistant and fast growing tree	Mizo
-	-	Mizo
	-	Mizo
Decoction of bark is used in treating diarrhoea, dysentery and rheumatism	Juice of crushed bark is also applied to fresh cuts	Mizo
Leaves are used for fermenting cooked soyabean (<i>Bekang</i>), a traditional mizo delicacy	-	Mizo
Bark is used in diarrhoea, milky juice is applied on inflammatory diseases of glands and sometimes used as milk in tea. Leaves are lopped for cattle fodder	It is a shade bearer in youth and grow very fast	Mizo
-	-	Mizo
Bark is useful in fever, diarrhoea, itching and flowers in menstrual disorders	Leaves are lopped for cattle fodder	Mizo
Bark yields a strong fibre and used for making ropes and cordage . leaves are lopped for cattle fodder	It is a light demander and fast growing tree. Tolerates moderate shade in youth	Mizo
-	-	Mizo
-	-	Mizo
Leaves are loped for cattle fodder		Mizo
	It yields the para rubber, the finest and the most durable catoutchouc known	Mizo
Leaves are used as soap for washing 'Mizo Pawnpui' (Blanket)	It is a fast growing, good coppice and facvoured for birds nesting. Bark can be used for poisoning fish, juice of crushed bark and leaves are used to tick bite.	Mizo
Decoction of bark is used as an effective remedy for diabetes and high blood pressure	Leaves are lopped for cattle fodder	Mizo
Infusion of leaves/bark is used against black water fever, malarial fever, jaundice, typhoid, stomach ulcer and kidney stones		Mizo
		Mizo
Bark is used internally for pain in stomach		Mizo
Silkworm fed on its leaves. Leaves are sometimes boiled with meats and eaten as curry. Root bark, leaves and fruits are also medicinal.	Young leaves and twigs are good for cattle fodder	Mizo
Bark fibre which is called <i>Hruikhau</i> is used for making into rope and <i>Hnam hrui</i> . Leaves are used for fermenting cooked soyabean (<i>bekang</i>) and sometimes for wrapping food in.	-	Mizo
Flowers are eaten cooked as vegetables, leaves are lopped for cattle fodder	It is a light demander and frie resistant, fast growing tree	Mizo
-	-	Mizo

Bark used to poison fish. Leaves are lopped for cattle fodder	It is a moderate light demander and fast growing tree	Mizo
Leaves, tender fruits and flower buds are eaten as vegetable	It is a moderate light demander and wind firm tree	Mizo
Thick paste of the plant is applied on broken bone. Juice of the plant is also	Plant is laxative and cooling used for cold, sinusitis and	Mizo
applied on sore of baby's navel	menstruation problems	
Decoction of bark is used in stomach troubles, fever, diarrhoea and also	-	Mizo
apllied on measles, chickem pox, sprains and burns. Leaves are cooked in		
water and water is taken as a remedy for high blood pressure.		
Tender leaves are boiled with meats and eaten as vegetables		Mizo
Young shoots are eaten in curries, amd fibre can also be used as rope	Fast growing tree	Mizo
-	-	Mizo
		Mizo
Root, leaves and flowers are also used medicinally. Bark and young leaves		Mizo
are used as a remedy for fever, stomach ache etc		
Bark is bruised, boiled with soil impregnated with urine to produce a bluish	Fast growing tree	Mizo
dye

-	Cane is used for making chairs, walking stick, basket etc. tender pith of upper part of the stem is eaten as vegetable	Fruits are used as purgative and also used for curing chronic stomach ulcer	Mizo
			Mizo
-	Eri silkworm feeds on the leaves. Young leaves are used as poultice for carbuncle, ulcer and boils, applied in sciatica and paralysis	Oil obtained from the seed is used for making enamels, paints, varnishes etc. Seeds are used as poison for fishing.	Mizo
_	Root-bark is used a remedy for fever and leaves for stomach complaints	-	Mizo

-	Root yields cassava starch and tapioca meal. Starch is used for	Young shoots fried with fish are eaten as food. Tuberous	Mizo
	preparation of adhesives, cosmetics, puddings, biscuits etc, tuberous	roots are used externally for skin diseases, eaten by wild	
	roots are eaten cooked or fried as curry.	animals	
-	Leaves are eaten cooked as vegetable. Pulp around the seed is used as	-	Mizo
	dye. Milky juice is prescribed in eye diseases. Root-bark for mouth sore,		
	toothache, etc. bark is pounded with a small quantity of water and juice is		
	used a s remedy for convulsions in children		
Culm, young shoot	Young shoot are used in curries.	Culm is used for temporary building, mats, baskets, etc	Mizo
Culm, young shoot	Young shoots are eaten cooked as vegetable	Outermost portion of green culm is also used to stop	Mizo
		bleeding from wound or cut. Culm are used for paper,	
		building, baskets etc.	
Culm, young shoot	Young shoots are eaten cooked as vegetable	Buhban (Sticky Rice) is also cooked in the joints. Culm is	Mizo
		used for making baskets, mats, mizo looms, ceiling,	
		partition walls etc.	
-	It is used for making baskets, hats etc	Juice of the stem is taken for influenza and also applied to	Mizo
		scalp for curing dandruff, falling hairs and baldness	
-	-	-	Mizo
-	Wood is used for floors, drums, door and window frames. Milky juice is	Bark and leaves are used for poisoning fish	Mizo
	mixed with water and given in indigestion; juice of the bark is applied on		
	wounds. Leaves are lopped for cattle fodder		
-	Cane is used for making baskets and furnitures	-	Mizo
-	-	Paste of stem is applied on boils	Mizo
-	Stem yields a soft glossy fibre	-	Mizo
-	Wood is soft and used for charcoal, firewood. Young berries are used for	Silkworm reared on leaves. Boiled water is used as remedy	Mizo
	flavouring stews etc. fruits eaten by birds	for sciatica and high blood pressure	
-	-	-	Mizo
-	-	-	Mizo
ı	Fruit is edible.	Decoction of bark used in treatment of diarrhoea, dysentery	Mizo
		and rheumatism. Juice of the crushed bark is also applied to	
		fresh cuts	
-	Underdevelop shoots are eaten as vegetable	It is used for making baskets, mats, furniture, chair seat etc	Mizo
-	-	Bark is used for tanning. Leaves are lopped for fodder	Mizo
-	Terminal bud is eaten cooked as vegetable.	Fibre is made into ropes, brushes, brooms, baskets	Mizo
-	Fibres are used for fiddle strings, traps etc	Upper part of the palm containing young underdeveloped	Mizo
		leaf shoot is used as vegetable. Midrib of leaflet is used to	
		make brooms etc
